

## **CEBM** examples of a Strong Adult Posture at each Tier – **Elementary**

| Tier 1 universal practices   | Tier 2 targeted practices  | Tier 3 individualized practices  |
|--|--|--|
| <ul> <li>Providing an 'Alpha' posture (confident, taking the lead, grounded, caring, taking responsibility)</li> <li>Not befriending students (they need that natural healthy hierarchy to feel safe and taken care of)</li> </ul> | <ul> <li>Understanding that when a student at Tier 2 is overwhelmed emotionally, which results in behavioural manifestations, the first step and priority of the adult should be to re-establish a sense of safety for the student (whether by managing the circumstances and environment, or by co-regulating with the student)</li> <li>Being calm and grounded before responding to an upset student, and not taking their behaviour personally</li> <li>Being mindful about displaying neutral/gentle facial expressions, a non-threatening stance, a stable voice volume, tone, speech rate, or talking too much</li> </ul> | <ul> <li>Understanding that when a student at Tier 3 is triggered and dysregulated, they are not receptive to our interventions in the moment (must focus on establishing safety for all first)</li> <li>Not being alienated by their behaviour and keeping the posture</li> </ul> |
| <ul> <li>Establishing clear limits and<br/>boundaries (without getting upset if</li> </ul>   |  | of a nurturing provider  |
| students push back)  Being calm and grounded before responding   |  | <ul> <li>Being neutral, steady, and grounded<br/>when intervening and keeping the<br/>students' wellbeing in mind</li> </ul>   |
| <ul> <li>Adjusting when things don't go as<br/>planned (making it look like as if it<br/>was your plan all along)</li> </ul>   |  | <ul> <li>Backing away from conventional<br/>discipline and ultimatums, which<br/>may trigger the student further</li> </ul>  |
| <ul> <li>Managing the circumstances and the environment rather than trying to directly control student behaviour</li> </ul>  |  | <ul> <li>Relying on co-regulation, as well as<br/><u>de-escalation strategies</u> if needed to<br/>defuse the situation</li> </ul>   |
|  | When a student is upset, waiting<br>until a more appropriate time to<br>address the situation (when the<br>student has returned to a state of<br>calm and is open and receptive)   | <ul> <li>Relying on the key elements to effect<br/>change: structures, routines,<br/>predictability, adapted scheduling,<br/>respite, movement, being<br/>preventive/proactive</li> </ul>  |
|  | ☐ Conveying to other children that you are aware the student in question is upset, that you are handling the situation, and they can focus on their own task at hand   | <ul> <li>Relying on the power of teamwork to<br/>share the weight and responsibilities<br/>(this will help adults keep their<br/>posture intact)</li> </ul>  |
|  |  | <ul> <li>Implementing the safety plan when<br/>needed. All students need to feel<br/>safe and taken care of</li> </ul>   |
