

Build a Block Tower Game

Instructions:

Print the game board on cardstock. If desired, laminate for durability.

Find a dice and two objects to use as game markers (buttons, small plastic animals, or whatever you like). Put markers on the START spot.

Players each start with two bricks and begin to form a tower. Players take turns rolling the dice and move to the appropriate spot on the game board. Players continue taking turns and building towers until both players make it to FINISH. The player with the tallest tower wins the game.

Meet the Little Bins for Little Hands Duo!

Hi! My name is Sarah, and this is my son Liam. He's actually 13 now. We still LOVE playing around with science and STEM at home.

I shared a simple baking soda and vinegar science activity ten years ago with him. Since then, we've been hooked! Together we have enjoyed 100s of science experiments that are low cost, easy to set up, and just plain FUN!

I always aim to provide the BEST science activities and STEM projects that fit your time and budget! We hope you enjoy the materials we have put together for you today!

~Sarah and Liam
