

Intervention Planning: Moving from Observation, Reflection, to Intervention Suggestions to Implement

Service request: A group that is presenting numerous challenges, making teaching very difficult and behaviors are constantly interrupting the flow of what the adults are trying to do with the students.

Classroom Observation – What Am I Looking For?

Tier 1 Interventions ^{1, 2}	What I see (Classroom Observation)	What is missing (Reflection)	What is needed to help meet the needs of the group (and be the foundation for Tiers 2 and 3 students who are in this class group) (Intervention suggestions to implement)
<input type="checkbox"/> Teacher greeting and engaging their students individually and as a group (in morning and after each transition) ^{2, 3, 4}	<input type="checkbox"/> Is the teacher consciously greeting students as they arrive in the morning? <input type="checkbox"/> Is the teacher distracted, getting things ready for the day – the student enters without connecting with teacher? <input type="checkbox"/> <u>Is this done consistently</u> after each separation/time of transition (recess, lunch, phys. Ed., French, etc.)? <input type="checkbox"/> Does the teacher have different ways of capturing student’s attention? <input type="checkbox"/> Rhythmic sounds, chants, clapping, singing, calling out? <input type="checkbox"/> Does the teacher decrease other distractions (ex. Music playing in the background) to help prime attention in their direction? <input type="checkbox"/> Does the teacher have a ‘morning routine’ that becomes a mode of priming student’s attention?	<input type="checkbox"/> If greetings are sporadic and/or inconsistent, they will not carry the same weight and value as an intervention <input type="checkbox"/> Does the teacher understand the importance and value of this intervention? <input type="checkbox"/> Is the teacher aware that some students are not ‘tuned into’ what they are saying when they begin to deliver instructions? <input type="checkbox"/> If yes, what do they do about it, strategies? <input type="checkbox"/> If not, how can these be supported to prime their attention towards the adult who is speaking?	<input type="checkbox"/> Provide examples of how this can take place. <input type="checkbox"/> Encourage that the teachers find their ‘personal’ way of greeting as this will increase the probability of it being done consistently. <input type="checkbox"/> Share the link to CEBM website for examples & resources. ^{3,4} <input type="checkbox"/> Speak to the importance of having everyone’s attention prior to giving instructions as this will prevent numerous repetitions and the students calling out ‘I don’t know what to do!’ <input type="checkbox"/> ‘Call for attention,’ pause, ‘call’ again (if needed), PAUSE, THEN give leading instructions.
<input type="checkbox"/> Well established structures and routines ²	<input type="checkbox"/> Is the teacher in the lead, explicitly – alpha stance, tone, and presence? <input type="checkbox"/> Is there a daily schedule, well visible for the students? <input type="checkbox"/> Is this reviewed at the start of each day? <input type="checkbox"/> Is it referred to during the day to show the progress in time of the day? <input type="checkbox"/> Is there an explicit ‘Morning Routine, ‘Returning from Recess/Lunch Routine’? <input type="checkbox"/> How are transition times handled? <input type="checkbox"/> How does clean-up take place? <input type="checkbox"/> Is the room organized, clutter-free? <input type="checkbox"/> Is it easy to see ‘what’ goes ‘where’ when you scan the room? (e.g., Lunch boxes, agendas, games, etc.) <input type="checkbox"/> If different workstations are available, how are they being accessed? Organized & calm OR Chaotic, loud, rushing to grab a spot? <input type="checkbox"/> Are the work tools readily accessible, ex. Community Basket’, if a student can’t quickly find theirs when beginning a task?	<input type="checkbox"/> Are the students responding to the adult requests? Does the adult’s intervention grab the students’ attention to have them follow the adults’ requests? <input type="checkbox"/> Are the students aware of what comes next? <input type="checkbox"/> Are the students able to get ready for the next task independently when 1-2 prompts are given by the adult? <input type="checkbox"/> What are the ‘points of friction?’ When things are not going well. <input type="checkbox"/> Tuning in to the teacher when ‘called for attention’ <input type="checkbox"/> Having work tools out & ready to work <input type="checkbox"/> How easy is it for the students to find what they need? <input type="checkbox"/> Getting on task <input type="checkbox"/> Staying on task <input type="checkbox"/> Disrupting others <input type="checkbox"/> Staying in one’s place and/or area <input type="checkbox"/> Transitions <input type="checkbox"/> Clean-up <input type="checkbox"/> Lining up <input type="checkbox"/> Preparing for the end of day departure	<input type="checkbox"/> Encourage reading and viewing: ‘How We Lead Matters’ Ch.3 (p. 31-39) from Reclaiming Our Students by Hannah Beach and Tamara Strijack. <input type="checkbox"/> Discussion with the teacher to share observations – prioritize changes where the greatest impact can be profited from first. Then address others sequentially. <input type="checkbox"/> Having clear, explicit & consistent structures and routines, creates a predictable environment where the students feel safe. This has a direct impact on reducing misbehavior and outbursts which require intervention and derail the focus of the group. <input type="checkbox"/> Organization of materials - color-coding, labelled, in desks vs in group bins. <input type="checkbox"/> Encourage the teacher to have 1-2 Community Baskets ⁵ filled with tools ready to work – it helps to reduce ‘getting on task time’ and frustrations. <input type="checkbox"/> Discussion of dependence vs independence (readiness, maturity). <input type="checkbox"/> Suggest regular ‘desk clean-up’ as part of the end of week routine – helps to de clutter and remove unnecessary items – ready to start the next week on a good foot!

<p><u>Tier 1 Interventions</u>^{1, 2}</p>	<p>What I see (Classroom Observation)</p>	<p>What is missing (Reflection)</p>	<p>What is needed to help meet the needs of the group <i>(and be the foundation for Tiers 2 and 3 students who are in this class group)</i> (Intervention suggestions to implement)</p>
<p><input type="checkbox"/> Visuals to cue desired behaviors²</p>	<ul style="list-style-type: none"> <input type="checkbox"/> Physically the class is laid out with clear sections, easy passage from one area to another. <input type="checkbox"/> Desk organization facilitates the students 'looking AT the teacher'. <input type="checkbox"/> Areas are labelled. <input type="checkbox"/> Clean & organized. <input type="checkbox"/> Work tools are available in each area. <input type="checkbox"/> Clutter free – low visual distraction. <input type="checkbox"/> Visual calendar is placed in location easily seen by students. <input type="checkbox"/> Items on walls are pertinent and timely. <input type="checkbox"/> Academic tools are placed in a logical location for its use and are large enough to facilitate its use from different areas of the room. 	<ul style="list-style-type: none"> <input type="checkbox"/> Clear, wide passageways between rows or clusters of desks facilitates movement and helps to reduce frustration and disruptions. <input type="checkbox"/> When the classroom is disorganized, the students stray to different areas rather than move about with purpose. Clear, predictable set-up enables quick, efficient transitions. <input type="checkbox"/> The design of the physical layout in a class can either prime attention towards the teacher or prime peer attachment – ensure that the layout meets the needs of students and their maturity level. <input type="checkbox"/> When the number of students per area is identified, less adult intervention will be needed to have the students respect the classroom parameters. <input type="checkbox"/> Having work tools at each workstation reduces roaming back-and-forth, disrupting others, and increases on task time. <input type="checkbox"/> Following the daily schedule helps students know 'where' they are in the day and helps them look forward to the times they enjoy most. <input type="checkbox"/> When the classroom decorations fill the room, the important pieces of information get lost, and the students no longer refer to the tools that could be a support to them. 	<ul style="list-style-type: none"> <input type="checkbox"/> Consider adapting the layout of the classroom to widen passage space to reduce friction and frustration. <input type="checkbox"/> Consider shifting the angle of vision for the students who struggle with paying attention to the teacher. <input type="checkbox"/> Please refer to the CEBM website – document on Classroom Physical Layout & Priming Attention.² <input type="checkbox"/> Consider moving to a less distracting location the students who struggle to maintain 'on task attention'. <input type="checkbox"/> Offer suggestions to reduce clutter and visual distractions. <input type="checkbox"/> Pack-up & put away items that are not being used during this period of the year. <input type="checkbox"/> Send home artwork that is completed after each short display. <input type="checkbox"/> Encourage labelling of the different areas in the classroom, adding a visual to identify the number of students who can be in each area at a time. <input type="checkbox"/> Establish 'helpers' to assist in keeping work tools in workstations 'ready for use'.
<p><input type="checkbox"/> Short work periods²</p>	<ul style="list-style-type: none"> <input type="checkbox"/> How long are students expected to be 'on task'? <input type="checkbox"/> Are they expected to be at their desk, or can they be in different locations? <input type="checkbox"/> Are instructions clear of what is expected to be done? Is this reviewed explicitly? <ul style="list-style-type: none"> <input type="checkbox"/> How can they get assistance from the adult? Raise hand, call out, walk around? Come to the teacher? <input type="checkbox"/> What is done for the for the students who struggle with understanding what they need to do? Who struggle to begin the task? <input type="checkbox"/> Do students know what they can do when they have completed their work? <input type="checkbox"/> Do they follow through and move on to these possibilities? <input type="checkbox"/> What is done/coached when the students who have finished, roam and disturb others who are still on task? 	<ul style="list-style-type: none"> <input type="checkbox"/> Which portion of the group can stay on task for the period requested by the teacher? <ul style="list-style-type: none"> <input type="checkbox"/> Is the expected 'on task time' appropriate for this age group? <input type="checkbox"/> For students who require scaffolding tools to assist them with their tasks, are they available from the start or do they need to ask for them? <input type="checkbox"/> For students who need support – do they ask? Is there a management strategy in place to help them to have support to begin their task? <input type="checkbox"/> For Fast Finishers, do they know what is available for them, do they shift to this next task independently or with prompts? 	<ul style="list-style-type: none"> <input type="checkbox"/> Are the work periods too short, just right or too long? Have this discussion with the teacher. <ul style="list-style-type: none"> <input type="checkbox"/> Identify the signs, behaviors observed – particularly when the time is too long, and the students struggle to maintain attention, effort, and energy. <input type="checkbox"/> Encourage the teacher to break tasks into manageable chunks to increase engagement and motivation to do tasks. <input type="checkbox"/> Consider providing scaffolding of tasks to support students – Implementation of Executive Functioning Intervention Guidelines and Strategies.⁷ <input type="checkbox"/> Encourage the use of Brain Breaks in between these 'steps' within longer tasks.

<p><i>Tier 1 Interventions</i>^{1,2}</p>	<p>What I see (Classroom Observation)</p>	<p>What is missing (Reflection)</p>	<p>What is needed to help meet the needs of the group (and be the foundation for Tiers 2 and 3 students who are in this class group) (Intervention suggestions to implement)</p>
<p><input type="checkbox"/> Alternate seating options – different items to sit on or sit in^{2,7}</p>	<p><input type="checkbox"/> Scan the room, how many different options are available for the students?</p> <ul style="list-style-type: none"> <input type="checkbox"/> Chairs, different types of stools, options on the ground. 	<p><input type="checkbox"/> Are students sitting in an ergonomic position that meets their needs (height of chair and desk/table)? If their desk and work surface are not properly aligned with the height for their body, this can have a direct link with their struggle to attend, stay on task, sit calmly in their workstation. Hence, increased frustration and behaviors may result.</p>	<ul style="list-style-type: none"> <input type="checkbox"/> Discuss with teacher alternate seating options – are they aware of the range, their possibilities, and benefits? Share links to the CEBM website for information, <i>Maximizing Your Classroom</i>⁷ document, that provides a wide range of options and visuals. <input type="checkbox"/> Discuss the importance of properly introducing these work TOOLS, how to access an expected behavior while using these tools. SAFETY is of highest importance; this needs to be addressed consistently. <input type="checkbox"/> Encourage a review of each student’s work position – adjusting desk height, change in chair (if needed) as this can make a significant difference in a student’s demeanor and availability for learning throughout the school day.
<p><input type="checkbox"/> Alternate workstation options – different locations within the classroom for students to work^{2,7}</p>	<p><input type="checkbox"/> Scan the room, how many different options are available for the students?</p> <ul style="list-style-type: none"> <input type="checkbox"/> Are all students sitting at desks? <input type="checkbox"/> Are some standing at their desk or in different locations throughout the room? <input type="checkbox"/> Are there places where the students can work on the ground comfortably? 	<p><input type="checkbox"/> Some students’ needs are met with a desk and chair, while others benefit/need alternate working positions to keep their brain engaged and learning.</p> <p><input type="checkbox"/> If alternate workstations are not present in the class, does the physical layout facilitate its introduction?</p>	<ul style="list-style-type: none"> <input type="checkbox"/> Discuss with teacher alternate workstations – are they aware of the range, their possibilities, and benefits? Share links to CEBM website for information, in particular the <i>Maximizing Your Classroom</i>⁷ document that provides a wide range of options and visuals. <input type="checkbox"/> Discuss the importance of properly introducing these workstations, how to access them, the number of people per station and the expected behavior while working there.
<p><input type="checkbox"/> Physical movement (high or low energy) “Brain Break” – after each work period^{2,8,9}</p>	<p><input type="checkbox"/> Are physical (high energy) and quiet (low energy) brain breaks used to separate work periods throughout the day?</p> <p><input type="checkbox"/> Is the teacher leading the brain break activity or are they using a video on Smartboard?</p> <p><input type="checkbox"/> Which portion of the group is actively participating in the brain break activity?</p>	<p><input type="checkbox"/> Brain Breaks are a great time for teachers to be playful and have fun with their students – it is best that THEY be the leader.</p> <p><input type="checkbox"/> Do they repeatedly engage in the same activities, or do they mix it up frequently?</p> <p><input type="checkbox"/> Do they sometimes have students be the leaders? This could encourage students to participate and engage more readily.</p>	<ul style="list-style-type: none"> <input type="checkbox"/> Discuss the benefits of Brain Breaks to help the students to get energy out, shift their brains to something else as this will help them apply themselves for the next upcoming task. <input type="checkbox"/> Share the CEBM website link for the Brain Break page – a wide range of resources and references that are based on neuroscience and its benefits to growing brains.^{8,9} <input type="checkbox"/> Encourage teachers to share ideas and materials to have a wider range of activities in their repertoire of brain break activities.
<p><input type="checkbox"/> Individual “Quiet Time” (low energy) activity – ex. small craft, sketching, mandalas/coloring pages, Search’N Find, etc.)^{2,10}</p>	<p><input type="checkbox"/> Are there different quiet activities (low energy) readily available for students to access during transition times, when they have finished work or need a break to help manage their emotions?</p> <ul style="list-style-type: none"> <input type="checkbox"/> Do they have easy access to these? <input type="checkbox"/> Does the selection change periodically? 	<p><input type="checkbox"/> Quiet brain break activities are a good way for students to have activities that are rhythmic and soothing to the brain.</p> <p><input type="checkbox"/> Are they aware that this is available for them? Do they know its intended purpose?</p>	<ul style="list-style-type: none"> <input type="checkbox"/> Discuss with the teacher the benefits of these quiet activities to help channel emotions, shift attention and have some calming time. <input type="checkbox"/> Brainstorm with the teachers the types of quiet activities they offer and that they may consider adding to their present selection. It’s important to change the variety periodically to maintain interest and engagement.¹⁰

<p><u>Tier 1 Interventions</u>^{1,2}</p>	<p>What I see (Classroom Observation)</p>	<p>What is missing (Reflection)</p>	<p>What is needed to help meet the needs of the group (and be the foundation for Tiers 2 and 3 students who are in this class group) (Intervention suggestions to implement)</p>
<p><input type="checkbox"/> Emotional release activity with the whole group – daily^{2, 11}</p>	<p><input type="checkbox"/> When emotions rise in the group, what are the teacher’s interventions? How is this addressed? What is done to help the students channel this energy?</p> <p><input type="checkbox"/> Are there lessons, discussions and activities being done with the group around emotions? Naming, expressing, sharing.</p>	<p><input type="checkbox"/> Is the choice of intervention helping to reduce the intensity and frequency of these episodes?</p> <p><input type="checkbox"/> Is there a pattern to when this unfolds? (Ex. After recess, returning from lunch)</p> <p><input type="checkbox"/> What is done on a prevention level?</p> <p><input type="checkbox"/> Is the technician providing supportive intervention to assist the students with emotional expression, processing and managing challenging situations?</p>	<p><input type="checkbox"/> Share with the teacher information on the <i>Emotional World of students</i>¹³ and the benefits of providing opportunities for emotional release on a regular basis.</p> <p><input type="checkbox"/> Please refer to the <i>Inside-Out Handbook</i> that accompanies the <i>Reclaiming Our Students</i> book by Hannah Beach and Tamara Strijack.</p> <p><input type="checkbox"/> Encourage support from Technician to implement activities to help students express, process, and manage their emotions.¹¹</p> <p><input type="checkbox"/> Encourage the use of targeted children’s literature to help prime and build a language of emotions.¹⁴</p> <p><input type="checkbox"/> Providing support on the playground will go a long way to helping them grow into being able to express and manage their emotions productively.</p>
<p><input type="checkbox"/> Designated Area for students to retreat to within the classroom when a break is needed from the group and/or their work^{2, 14}</p>	<p><input type="checkbox"/> Is there a Designated/Quiet Area within the classroom?</p> <p><input type="checkbox"/> If yes, are the students able to ‘go into & cocoon?’ A private area where others cannot see them.</p> <p><input type="checkbox"/> Does it have sensory materials: things to touch, fidgets, weighted animal?</p> <p><input type="checkbox"/> Does it have visual props to cue breathing techniques?</p> <p><input type="checkbox"/> Are there calming items to look at – nature scenes, photos of animals, mazes, search and find books or tracing activities?</p> <p><input type="checkbox"/> Is there something comfortable to sit on – foam tiles, bean bag, large pillows?</p> <p><input type="checkbox"/> Is the area and its items being used appropriately?</p> <p><input type="checkbox"/> Are the students aware and respecting that this intervention area is for 1 student at a time?</p>	<p><input type="checkbox"/> Each Designated Area will be different; the key is that there are a range of items that help meet the needs of the students in this particular class.</p> <p><input type="checkbox"/> Are the students who are using this intervention area benefiting from this intervention?</p> <p><input type="checkbox"/> It’s important that things be changed periodically to prime interest and engagement.</p> <p><input type="checkbox"/> Although this can be a very good intervention tool within a classroom, it can also be challenging for students to use this space appropriately, safely and consider the materials as tool and not toys.</p> <p><input type="checkbox"/> It is important that this be reviewed regularly and that items that are not properly being used be removed for a block of time (or replaced). They can be reintroduced, with explanation, at a later date.</p> <p><input type="checkbox"/> Safety is a top priority when visiting and using the Designated Area.</p>	<p><input type="checkbox"/> If an area is present, review with teacher how this was introduced with their students. How is it being used? Do they find that it is presently being used well? Is it beneficial to their overall intervention strategies?</p> <p><input type="checkbox"/> Consider making changes if there are challenges in this area – it is important that the teacher regularly review how this space is to be used and its purpose within the classroom.</p> <p><input type="checkbox"/> Encourage the support of the Technician to assist in coaching students with its proper use.</p> <p><input type="checkbox"/> Share the CEBM website link for the <i>Designated Area</i> – video capsule and document to provide additional ideas and understanding.¹⁴</p>
<p><input type="checkbox"/> Community projects (1-3 per classroom) Puzzles, building game (Lego, maze building, mural weaving)^{2, 15, 16}</p>	<p><input type="checkbox"/> Are there community projects present within the classroom?</p> <p><input type="checkbox"/> If yes, are students aware ‘when’ they can go to these? Is it clear that all students can contribute to its assembly/evolution?</p>	<p><input type="checkbox"/> This is a great means to help build group identity and a sense of belonging in a class.</p> <p><input type="checkbox"/> It’s important that these be age appropriate and of interest to the particular students in this group, otherwise they will not be interested, nor will they engage.</p> <p><input type="checkbox"/> It’s important that things be changed periodically – involve your student to choose the next projects!</p>	<p><input type="checkbox"/> Encourage the teacher to welcome 2-3 ongoing projects within their class, this is a great way for the students to channel energy, create and problem solve.</p> <p><input type="checkbox"/> Puzzle¹⁶, ongoing building & creating project, group craft project (ex. mural, large collage, weaving, loom knitting, large mandala coloring).</p> <p><input type="checkbox"/> Share the CEBM website link for <i>Building & Creating</i> as this will provide different ideas and suggestions.¹⁵</p>

<i>Tier 1 Interventions</i> ^{1, 2}	What I see (Classroom Observation)	What is missing (Reflection)	What is needed to help meet the needs of the group <i>(and be the foundation for Tiers 2 and 3 students who are in this class group)</i> (Intervention suggestions to implement)
<input type="checkbox"/> Increased opportunities to be outside – structured games, learning times, play ^{2, 8}	<input type="checkbox"/> Does the teacher seize opportunities to bring learning outside? <input type="checkbox"/> Are the students given additional recess time outdoors when their energy level in the classroom is not productive? <input type="checkbox"/> For the students who struggle during recess and lunch, is there a plan to help structure their time outdoors to help them engage well and have fun?	<input type="checkbox"/> Some students really struggle with long blocks of time indoors, what means is put into place to help them manage themselves, so they won't get into trouble?	<input type="checkbox"/> Share with the teacher the link to the CEBM with the benefits of bringing movement into learning – increased retention. ⁸ <input type="checkbox"/> Some students need additional movement to be able to function well within the classroom – seek support from the Technician if this can be beneficial for your students.
<input type="checkbox"/> Sensory stimulation - Overall physical environment ^{2, 17, 18}	<input type="checkbox"/> How is the natural lighting in the room? <input type="checkbox"/> Are neon lights being used? <input type="checkbox"/> Visual decor: <input type="checkbox"/> Sparse and purposeful? <input type="checkbox"/> Cluttered and overbearing? <input type="checkbox"/> Are different sensory tools available for use by the students to help them regulate their emotions and energy? (Ex. Fidgets, sensory area with things to touch/feel, egg chair or covered table as an area to cocoon in)	<input type="checkbox"/> Are blinds present, are these used strategically as natural lighting changes during the day? <input type="checkbox"/> Is the 'feel of the room' calm and inviting, or crowded and overwhelming? <input type="checkbox"/> When the students struggle with their energy level, what do they gravitate towards in the class? Where do they move to?	<input type="checkbox"/> Share the CEBM website link for Sensory & OT Perspectives ¹⁷ and Sensory Materials ¹⁸ sections as these will provide different intervention suggestions and greater understanding of their potential benefits.

Tier 1 interventions are UNIVERSAL interventions that benefit the whole group to function within the classroom

Observation Outside the Classroom & In the Intervention Space – ‘What Am I Looking For’ for the Tiers 2 & 3 Students who struggle in the classroom and need Intervention strategies beyond the classroom to be successful at school?

Note: These interventions are recommended, in addition to the Tier 1 Interventions addressed in the first part of this document.

<u>Tier 2 Interventions</u> ^{1, 19}	What I see/What I inquire about (With classroom teacher and support staff working with these students)	What is missing (Reflection)	What is needed to support these Tier 2 students and their individual needs <i>(and a second layer of intervention for Tier 3 students)</i> (Intervention suggestions to implement)
<input type="checkbox"/> Daily CHECK-INS with a significant adult ¹⁹	<input type="checkbox"/> Are <i>Check-Ins</i> taking place with a significant adult in addition to the teacher’s greeting? <ul style="list-style-type: none"> <input type="checkbox"/> Is this measure in place? Is the student connecting with a significant adult regularly, on scheduled days and/or times? <input type="checkbox"/> Is the pertinent information collected during <i>Check-Ins</i> being relayed to the other adults working with and supporting this student?	<input type="checkbox"/> Is the frequency of the <i>Check-Ins</i> meeting the needs of the student? Should there be adjustments to the present schedule? <input type="checkbox"/> Is the adult, who is assigned to a particular student for the <i>Check-Ins</i> , informed when there’s a substitute teacher present in class so as to proceed with a follow-up? <input type="checkbox"/> Who is the ‘back-up’ adult to do these <i>Check-Ins</i> if the main person is absent?	<input type="checkbox"/> If this is not already set-up – begin this intervention for all Tier 2 students as it helps to build relationships over time and not only intervening when things are difficult. <input type="checkbox"/> Consistency and predictability are key in helping a student feel safe, valued, heard, and supported. <input type="checkbox"/> Share the link of the CEBM website – Tier 2 students and recommended interventions. Document, templates, and video capsules. ¹⁹
<input type="checkbox"/> Use of the Designated Area within the classroom AT SCHEDULED TIMES (ex. Transitions) ^{7, 19}	<input type="checkbox"/> Have the adults scheduled predetermined times when this student will have access to the <i>Designated Area</i> as a preventive strategy? (e.g., morning entry, return from recess) so as to help the student regulate their emotions and join the group successfully? <input type="checkbox"/> Are they using it appropriately? <input type="checkbox"/> Is this intervention beneficial for them? <input type="checkbox"/> Does the student reintegrate the group successfully following the time passed in the <i>Designated Area</i> ?	<input type="checkbox"/> Does the student understand the purpose of this space? When to use it? How the materials are meant to be tools, rather than toys, to help him manage their emotions when inside the classroom? <input type="checkbox"/> Are all the adults who work with this student informed of these strategies and their timing for this particular student?	<input type="checkbox"/> Prevention and intervention are always a good investment in helping to build capacity with the students who struggle to manage their emotions. <input type="checkbox"/> Encourage clear information and consistent parameters regarding the use of the <i>Designated Area</i> and its materials. <input type="checkbox"/> Guide proper use of materials, ensure that safety is a top priority when visiting this space. <input type="checkbox"/> Remove (or replace) items that are not being well used, retry at a later time. This helps to reduce frustration and friction with students.
<input type="checkbox"/> ASSIGNED Alternate Seating options and Alternate Workstation options ^{7, 19}	<input type="checkbox"/> Most Tier 2 students benefit from being assigned to alternate workstations and seating options as they have a great need to move – Is this present for them in the classroom? <ul style="list-style-type: none"> <input type="checkbox"/> Option to stand, work alone, but it can also be in a small group for discussions when needed. <input type="checkbox"/> When the students have access to this? <input type="checkbox"/> How is this determined? <input type="checkbox"/> For which length of time? 	<input type="checkbox"/> Are there clear instructions and parameters for the students’ movements within the classroom during work periods? <ul style="list-style-type: none"> <input type="checkbox"/> Is this clear to the Tier 2 students? <input type="checkbox"/> Is this applied consistently? <input type="checkbox"/> Which type of alternate station best meets the students’ needs? <input type="checkbox"/> When is this intervention most beneficial for them? <input type="checkbox"/> Are all the adults who work with these students informed of these strategies and their timing for these particular students?	<input type="checkbox"/> Having clear parameters helps Tier 2 students to navigate the demands of the classroom more appropriately – regular follow-ups between the teacher and the student are very helpful to reduce frustrations and miscommunications on both sides. The students can feel heard and sense that their needs are met. <input type="checkbox"/> Remove (or replace) items that are not being well used, retry at a later time. This helps to reduce frustration and friction with the students – SAFETY is our top concern. <input type="checkbox"/> Ensure that the strategies and interventions, which are chosen and implemented for the students, are shared with all adults supporting these Tier 2 students.

<p style="text-align: center;"><u>Tier 2 Interventions</u> ^{1, 19}</p>	<p style="text-align: center;">What I see/What I inquire about (With classroom teacher and support staff working with these students)</p>	<p style="text-align: center;">What is missing (Reflection)</p>	<p style="text-align: center;">What is needed to support these Tier 2 students and their individual needs <i>(and a second layer of intervention for Tier 3 students)</i> (Intervention suggestions to implement)</p>
<p><input type="checkbox"/> Movements Breaks in the hallway and/or outside as they have pent-up emotional and physical energy that must be released (otherwise they will be unable to focus and be attentive to the adult requests) – frequency dependent on student’s level of energy needing to be released ^{9, 19}</p>	<p><input type="checkbox"/> Tier 2 students tend to have LOTS of energy to expend. In addition to the <i>Brain Breaks</i> and outdoor times at recess and lunch, they still have energy to move, which needs to be released.</p> <p><input type="checkbox"/> Does the teacher have a <i>Movement Station</i> outside his classroom or within his classroom?</p>	<p><input type="checkbox"/> If the <i>Movement Station</i> is in place, it’s key to monitor and check what the student is doing when they are outside the classroom. If the support of an attendant or a technician is possible, this will be an asset.</p> <p><input type="checkbox"/> When it is set-up, make sure to model appropriate and expected behavior in order to provide clear guidelines and expectations for good physical release and appropriate behaviour when out in the hallway.</p> <p><input type="checkbox"/> Are all the adults who work with this student informed of these strategies and their timing for this particular student?</p>	<p><input type="checkbox"/> Setting up different movement options and changing them regularly can help engagement and motivation. The students can step out, get some energy out and return to the classroom.</p> <p><input type="checkbox"/> Share the link of CEBM <i>Brain Breaks</i> resources – Tier 2 – Outside the Classroom. ⁹</p> <p><input type="checkbox"/> Encourage the creation of Active Hallway stations within the school – movements throughout the school, with an adult, cannot only provide additional movement, but help sustain interest and motivation.</p>
<p><input type="checkbox"/> Scheduled Breaks in another location:</p> <ul style="list-style-type: none"> ○ Pre-determined location ○ Pre-determined times (visual schedule for student to have a visual anchor of when this will take place) ○ Pre-determined options of what can be brought and/or done in this location (Ex. Set-up a Personal Choice Board ²¹ when the student is calm and receptive. This will help them know and plan for their break away from the classroom) ¹⁹ 	<p><input type="checkbox"/> Does the Tier 2 student have a scheduled time in the intervention room or in the NSC with a Technician?</p> <p><input type="checkbox"/> Are the interventions aligned for their targeted needs? Emotions intervention, etc.</p> <p><input type="checkbox"/> Does the student have a <i>Personal Choice Board</i> ²⁰ to assist them when he comes to the intervention room or to the NSC?</p> <p><input type="checkbox"/> Does the Tier 2 student have a scheduled sheltered recess and/or lunch?</p> <p><input type="checkbox"/> Are passes being used to identify that the student is coming for a scheduled time?</p> <ul style="list-style-type: none"> <input type="checkbox"/> ‘I have a scheduled time in the NSC’ <input type="checkbox"/> ‘I need a break’ NSC pass <input type="checkbox"/> ‘I need to be supervised by an adult’ <input type="checkbox"/> ‘I need a quiet workspace in the NSC’ <input type="checkbox"/> ‘I need to talk with an adult’ <input type="checkbox"/> ‘I need a break from my work, I’d like a few minutes to myself’ <input type="checkbox"/> ‘I need a brain break’ 	<p><input type="checkbox"/> Is the student aware and have visual support to know when is their scheduled time?</p> <p><input type="checkbox"/> Is this frequency of the scheduled time meeting their needs?</p> <p><input type="checkbox"/> Are the interventions being transferred into the classroom? Are they being shared with the parents?</p> <p><input type="checkbox"/> Is there a means of communication that enables all the adults (including substitute teachers) to know which students have scheduled time outside the classroom? This helps avoid gaps and frustrations for both the students and the adults.</p>	<p><input type="checkbox"/> Periodic review of interventions scheduled – their impact and whether this is helping to support the student with their individual needs.</p> <p><input type="checkbox"/> Be ready to make changes and adjustments as the year unfolds - growth and challenging events will require adaptations.</p> <p><input type="checkbox"/> If needed, encourage support from Technician to implement activities to help the student express, process and manage their emotions. ¹¹</p>
<p><input type="checkbox"/> Individual/Personal bin that contains 2 different projects that they can use within the classroom for an <i>‘In-class Break’</i> or bring with themselves when they go to an alternate location ^{19, 20}</p>	<p><input type="checkbox"/> Does the student have a <i>Personal Bin</i> to assist them within the classroom and when they come to the intervention room or NSC?</p> <p><input type="checkbox"/> Has this been created and assembled with the student, to explain its purpose, its use and which types of activities will be included in their <i>Personal Bin</i>?</p>	<p><input type="checkbox"/> The use and purpose of the <i>Personal Bin</i> needs to be reviewed with the student periodically to ensure that this intervention is purposeful</p> <p><input type="checkbox"/> If one is present, are items changed regularly to maintain interest and engagement?</p> <p><input type="checkbox"/> Is there a means of communication that enables all the adults (including substitute teachers) to know which students have a <i>Personal Bin</i> and when these can be accessed? This helps avoid gaps and frustrations for both the students and the adults.</p>	<p><input type="checkbox"/> Share the link of CEBM <i>Personal Bin</i> resources – for Tier 2 students. ²⁰</p> <p><input type="checkbox"/> Discuss with the teacher the benefits of having bins that are ‘ready for travel’, as this can greatly facilitate a student leaving the classroom with few disruptions, as he knows he has activities he enjoys in his <i>Personal Bin</i>.</p>

<p style="text-align: center;"><u>Tier 2 Interventions</u>^{1, 19}</p>	<p style="text-align: center;">What I see/What I inquire about (With classroom teacher and support staff working with these students)</p>	<p style="text-align: center;">What is missing (Reflection)</p>	<p style="text-align: center;">What is needed to support these Tier 2 students and their individual needs <i>(and a second layer of intervention for Tier 3 students)</i> (Intervention suggestions to implement)</p>
<p><input type="checkbox"/> <u>You've Got Mail</u> – Intervention cards to provide movements as the student heads to a predetermined adult, fulfills the requirements of the card and returns to their classroom¹⁹</p>	<p><input type="checkbox"/> Are different strategies in place that orchestrate a student leaving the classroom for a short break, without this being perceived as negative nor a consequence?</p>	<p><input type="checkbox"/> Is the student in need of a 'Mail break' or a pass with an adult who will provide intervention support?</p> <p><input type="checkbox"/> It is important that this intervention be pre-established with the adults who will be receiving this student, and to ensure that if materials are needed (ex. materials for quiet activities), they will be readily accessible.</p>	<p><input type="checkbox"/> Explain that this intervention is like a 'boomerang' where the student leaves for a short break, with a purpose and then returns within a short period of time.</p> <p><input type="checkbox"/> Share the link of CEBM 'You've Got Mail' templates – 4 different models (2 active physical movements, 2 quiet-calming activities). It is best when they are 'matched' with the student's need for support.¹⁹</p>
<p><input type="checkbox"/> Assign to Foster Classroom - a predetermined pairing with a significant teacher where the student can take a break from their usual environment to focus on individual work or to complete quiet activities.¹⁹</p>	<p><input type="checkbox"/> Has the implementation of a <i>Foster Classroom</i> been considered?</p> <p style="margin-left: 20px;"><input type="checkbox"/> Is this measure already in place? Does the student regularly attend the designated class on the scheduled days and times?</p> <p><input type="checkbox"/> Is the relevant information gathered in the <i>Foster Classroom</i> relayed to the other adults who work with and support this student?</p>	<p><input type="checkbox"/> Does the frequency of the visits meet the student's needs? Should changes be made to the existing schedule?</p> <p><input type="checkbox"/> It is key that this intervention is pre-established with the adults who will be welcoming the student, and to ensure that if materials are required (for example, supplies for individual activities), such items are easily accessible.</p> <p><input type="checkbox"/> Is the adult assigned to the student informed that a substitute is in the classroom to conduct a personalized Check-In?</p>	<p><input type="checkbox"/> Integrate this strategy with all Tier 2 students who could benefit from this intervention. Furthermore, this measure is designed to help develop relationships over time, rather than intervening only when circumstances are challenging.</p> <p><input type="checkbox"/> Remember that consistency and predictability are key to making a student feel safe, valued, heard, and supported.</p> <p><input type="checkbox"/> Share the link to the CEBM website on the <i>Foster Classroom</i> - for Tier 2 students. You will find document, templates, and video capsules.¹⁹</p>
<p><input type="checkbox"/> Plan small-group emotional interventions with a significant adult to help the students name and process their big emotions.^{11, 19}</p>	<p><input type="checkbox"/> Do the Tier 2 students receive emotion-related interventions? Are such interventions carried out:</p> <p style="margin-left: 20px;"><input type="checkbox"/> In small groups of how many students?</p> <p style="margin-left: 20px;"><input type="checkbox"/> In the classroom or in another venue (e.g., NSC)</p> <p style="margin-left: 20px;"><input type="checkbox"/> At what time of the day (e.g., recess)?</p> <p style="margin-left: 20px;"><input type="checkbox"/> With which adult (e.g., classroom teacher, Technician, etc.)?</p> <p style="margin-left: 20px;"><input type="checkbox"/> With which resources (e.g., use of emotion cards, emotion books, emotion tools such as <i>Emotion Folder</i> and <i>Squawk Box</i>)?</p> <p><input type="checkbox"/> Are the interventions tailored to their specific needs?</p> <p><input type="checkbox"/> Is the relevant information gathered during these intervention sessions shared to the other adults who work with and support these students?</p>	<p><input type="checkbox"/> Does the frequency of these interventions meet the students' needs?</p> <p><input type="checkbox"/> Do students who use this measure benefit from it?</p> <p><input type="checkbox"/> Are the intervention methods adopted, and the choice of equipment contributing to a decrease in the intensity and frequency of the episodes?</p> <p><input type="checkbox"/> Does the Classroom teacher turn to the Technician for additional support?</p> <p><input type="checkbox"/> Are all the adults who work with these students aware of these strategies and when they need to be introduced?</p>	<p><input type="checkbox"/> Integrate this strategy with all Tier 2 students who could benefit from this measure. Moreover, it is meant to help build relationships over time, rather than intervening only when circumstances are difficult.</p> <p><input type="checkbox"/> Share the link of the CEBM website that focuses on emotional interventions for Tier 2 students – such as <i>Emotion Folder</i> and <i>Squawk Box</i> tools. You will find document, templates, and video capsules.¹¹</p>

<p style="text-align: center;"><u>Tier 2 Interventions</u> ^{1, 19}</p>	<p style="text-align: center;">What I see/What I inquire about (With classroom teacher and support staff working with these students)</p>	<p style="text-align: center;">What is missing (Reflection)</p>	<p style="text-align: center;">What is needed to support these Tier 2 students and their individual needs <i>(and a second layer of intervention for Tier 3 students)</i> (Intervention suggestions to implement)</p>
<p><input type="checkbox"/> End of Day Recap with the same significant adult who did the Check-Ins (if possible) ¹⁹</p>	<p><input type="checkbox"/> Are <i>End of Day Recaps</i> scheduled for Tier 2 students who struggle with the preparation to leave at the end of the school day?</p> <ul style="list-style-type: none"> <input type="checkbox"/> This can mean support in the classroom <input type="checkbox"/> This can mean support in the NSC or the Intervention Room <p><input type="checkbox"/> Is the pertinent information collected during <i>End of Day Recaps</i> being relayed to the other adults working with and supporting this student?</p>	<p><input type="checkbox"/> Who is the 'back-up' adult to do the <i>End of Day Recaps</i> if the main person is absent?</p> <p><input type="checkbox"/> Consistency and predictability are key in helping a student feel safe, valued, heard, and supported.</p>	<p><input type="checkbox"/> Many students struggle with transitions, especially at the end of the day because they are tired and have lived numerous frustrations throughout the day – providing support at this time can make a significant difference in how they end their day, and subsequently how they perceive and live their school experience</p> <p><input type="checkbox"/> The organization for the <i>End of Day Recaps</i> can be scheduled in the same manner as the <i>Daily Check-Ins</i> done in the morning</p> <p><input type="checkbox"/> Share link of CEBM website – Tier 2 students and recommended interventions. Document, templates, and video capsules ¹⁹</p>
<p><input type="checkbox"/> Ongoing communication amongst all adults working with these students is key ²¹</p>	<p><input type="checkbox"/> Which mechanisms of communication are in place for the adults supporting the Tier 2 students so as to share incoming and outgoing information?</p>	<p><input type="checkbox"/> If this is not readily in place – seek ways to enable that the communication can take place quickly and efficiently as this will help the team to be efficient and consistent in sharing pertinent information.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Communication with parents <input type="checkbox"/> Communication with professionals from the school board <input type="checkbox"/> Communication with professionals from outside resources 	<p><input type="checkbox"/> Share link of CEBM website for Intervention Planning resources and templates – these will provide examples that can help begin or support this process ²¹</p>

Tier 2 interventions are TARGETED interventions that are based on the needs of individual Tier 2 students

Tier 3 students require the school team to have a wide range of intervention strategies in place to help meet their particular needs. Each child is an individual, with their particular profile, circumstances and needs. For this reason, we recommend that these questions be part of the ongoing team discussions that take place to support these highly challenging students.

When OBVIOUS triggers are not SEEN, it doesn't mean there are none. **Tier 3 students are very complex**, to understand them well we must consider numerous angles, ask pointed questions and consider that each piece of information may directly be interlinked and be contributing factors to the present challenging circumstances and the student's state of distress and being unwell. We must be cautious to not assume or judge. Collecting peripheral information on contributing factors that are impacting the student will guide the creation of a plan to best help and support this student.

Guiding questions to consider
when collecting information:

Does the child feel safe at school? At home? Adults may think that they are 'being safe,' however the child's perception may be different. This directly triggers students, particularly those who have experienced trauma.

What is the student's FAMILY SITUATION? Family context plays a key role in a Tier 3 student's life. Are any of the experiences present in their profile? **Risk factors:** Physical abuse, sexual abuse, emotional abuse, emotional neglect, poverty, food insecurities, mental illness, divorce/separation, substance abuse, violence against mother, having a parent on deployment with the military, parent incarcerated, etc. **Protective factors:** generational support, pets, physically active, involved in extra-curricular activities, positive adult role models, accessibility of services, etc.

What is happening in the student's ATTACHMENT world? Has the student experienced separations from caregivers in the past, present or future (as the '*anticipation of*' can have the same or higher impact level)?

How does the student respond to VULNERABILITY? Are they a sensitive child? Do they have sensory issues? Learning struggles? Is there a diagnosis or a suspected diagnosis of ASD, ADHD, ODD, Anxiety, etc?

Is the students' MATURATION LEVEL relative to their chronological age? How does the student respond to something not working for them? Are they able to adapt, find an alternative solution, have their tears for what is not working? (ADAPTATION)

ATTEMPTS AT CONTROLLING BEHAVIOR - Are any of the following being used to '*control*' the Tier 3 student's behavior? Counting 1,2,3, ultimatums, reward systems, time outs, praise - these are contributing factors that fuel the student's frustration and defenses. Too much positive can also put unrealistic pressure and expectations on the child.

Which **outside services** are or have been involved in supporting this student, their family or the parents? Aim to have all 'players' informed and involved. Tier 3 students require a 'team approach' to provide a concerted effort at assessing the multiple factors involved, determining the best course of action and moving forward in a meaningful way.

Tier 3 students require numerous adaptations to be maintained in school

Individualized schedule

- Personalized, frequent Check-Ins in order to nurture the student-adult relationship and to keep an active flow of communication
- In class for specific times and subjects, with homeroom teacher only
- Part-time schedule (ex. at home 2 afternoons/week, 3 afternoons in NSC/Intervention area, 5 ams in the classroom with support)
- Personalized visual schedule during intervention blocks

Individualized Intervention

- Targeted intervention around emotions, naming, expressing, how to channel energy without getting into trouble
- Use of games, building and creating materials and art materials to provide contextual experiences
- Use of play and drama to help prime expression
- Providing a wide range of opportunities for the student to try intervention tools that can become part of a personal tool kit that can later be transferred into the classroom to help them be successful

Additions to consider

- Additional physical education class with support
- Physical education 1:1 with technician or attendant
- Sheltered Recess
- Sheltered Lunch
- Outdoor time may be when other students are in class

Presence at school alternatives to consider

- Student may be attending full days in school, but will not be in class full-time
- Student may have scheduled blocks of time in the NSC/Intervention area or in Resource Room
- Part-time schedule, may attend only when 1:1 support can be provided
- Part-time schedule, may attend subjects with homeroom teacher only

Out of school

- Homebound tutoring 5 hours/week - at home, in an alternate location, at school in a separate quiet location
- When student begins their return to school it is key to set-up a gradual integration schedule. The increases of time and demands are done very slowly so that they represent the student's capacity to manage more and not the adult's sense of urgency. Otherwise progress made can quickly be eclipsed and further struggles will need to be addressed.
